

LifeLine Gutters

Reinforced Rectangular LifeLine Gutter

With its reinforced rectangular design and profile (which will prevent the opening up of the gutter) and its respective height (outward side being slightly higher to reduce spill over of rainwater) and width each type of LifeLine Gutter enables far more effective harvesting of rainwater than competitive half-round gutters of same width and height.

Features

- Made from food contact grade U.V stabilized polyethylene
- Long lasting
- Cost effective
- Strong
- Light weight

Applications

- For Schools, Clinics, IDP, Refugee and Army Camps and other Institutions, Farms, Homes and Construction Sites.
